

The Newsletter

DEAR MADAMS AND SIRs,

We are pleased to send you the first newsletter of the Technet_nano network. Technet_nano is an alliance of public clean rooms and research facilities within the field of nano- and microtechnologies.

THEMATIC WORKSHOP

The Thematic Workshop "Cutting edge technologies: microfluidics, lab-on-a-chip-technologies and robotic high-throughput screening" will take place on March 20, 2013. Join us in Flensburg, Germany.

BEST-PRACTICE MODELS AND TRANSFERABILITY TO THE PROJECT

How to create a public network? We want to learn from experiences of other initiatives to create networks with public scientific facilities. Interviews with leaders of some of the most successful networks were conducted to understand their success.

HIGH NUMBER OF COMPANIES VISIT TECHNET_NANO

In 2012 altogether 123 companies visited Technet_nano partners and their clean room and lab facilities in Denmark, Sweden, Germany, Latvia and Lithuania. The purpose of these site visits is to bring the SMEs into close contact with the high technology offers of Technet_nano partners. These personal visits encourage companies to use this technology for improving their products and thus their market potential.

Technet_nano will intensify the dialogue with enterprises this year even more through the close cooperation with Enterprise Europe Network (EEN).

PARTNERS AROUND THE BALTIC SEA REGION

12 partner organisations from seven countries are engaged in the Technet_nano project.

[→ See our network](#)

We will publish four issues within the next 18 months focused on the services we offer. If you do not wish to receive the newsletter, please [click here](#). Please do not hesitate to pass the Technet_nano newsletter to others.

Kind Regards
Horst-Günter Rubahn, Leadpartner
